First International Workshop on Artificial Intelligence and Intelligent Systems (iwAIIS2026)
December 8-9, 2026 Marina Bay Sands, Singapore
List of Accepted papers

Sr.#	Paper ID	Paper Title
1	1	Quantum Phase Transitions in AI-Driven Economies: A Hilbert Space Approach to Wealth Dynamics in Transitional Economies
2	5	Three- Dimensional Stand Volume Model Based on Diffusion Processes
3	6	A Hybrid Bloom Filter and Blockchain PKI Authentication Framework for Privacy-Preserving Electronic Health Record Security
4	17	Multitemporal Phenological Stage Analysis of Soybean Crop Using Sentinel-2 Spectral Vegetation Indices and Unsupervised Machine Learning
5	18	Multimodal CNN–BiLSTM Framework with Cross-Attention Fusion for Freezing of Gait Detection Using IMU and Video Data with LOSO Validation
6	19	Hyperspectral Spatial-Spectral Attention Network (HSSAN) for Enhanced Land Cover Classification
7	21	Execution Over Appearance
8	22	Platform Effects in Sparse Sentiment Classification: Comparing Social Media and Yelp Reviews
9	24	Conflict-Routed Capacity Sprouting
10	29	A Multi-Model Generative AI Framework for Intrusion Detection in Zonal Automotive Networks
11	30	The Constraint Cliff: From Open-Loop KL Schedules to Divergence-Directed Regularization in GRPO
12	34	An Explainable Cross-Attention Residual Framework for Smile Prediction from Video Sequences
13	36	An Explainable Hybrid GLM–MVPA Machine Learning Framework for Functional Brain Activity Analysis and Alzheimer's Disease Classification
14	43	Early Diagnosis of Brain Tumor from CT Scans with Grad-CAM using Explainable MedAttn-ResNet50
15	52	Multihorizon forecast of vapor pressure deficit and characterization of the VPD-soil moisture relationship in coffee crops using machine learning
16	54	Detecting Synthetic Speech via Mel-Spectrogram Analysis and EfficientNet Convolutional Neural Networks
17	55	MoCoLoRA: A Resource-Efficient Framework for Multi-Label Thoracic Pathology Classification in Chest X-ray Images
18	60	The Agentic AI-Based Federated Recommendation Framework with Adaptive Privacy Control Based on Local Differential Privacy
19	67	SmartRoute: Scalable Spatiotemporal Traffic Speed Prediction via Haversine Grid Discretization and Gradient Boosting
20	68	From Retry to Reconciliation: A Semantic Effect-Ledger Framework for Reliable Tool-Using Artificial Intelligence Agents
21	70	An Explainable Hybrid Machine Learning Framework for Early Prediction of Chronic and Metabolic Diseases
22	72	A Compositional Game-Theoretic Method for System-Level Assurance Trade Studies in Embedded AI Systems
23	73	Consistency-Aware Hybrid GraphRAG for Financial Question Answering and Regulatory Validation

First International Workshop on Artificial Intelligence and Intelligent Systems (iwAIIS2026)
December 8-9, 2026 Marina Bay Sands, Singapore
List of Accepted papers

24	75	Spatio-Temporal Graph Network with Selective State Attention for Real-Time Skeleton-Based Human Behavior Anomaly Detection
25	76	Fast Search for Globally Optimal Solutions to Extremal Problems with Boolean Variables.
26	77	TRUST-FLOW: Counterfactual Trustworthiness Drift and Recovery under Controlled Distribution Perturbations
27	79	Federated Learning for Air Quality Forecasting in Smart Cities Using Apache Spark and Mobility Data
28	84	In-Season Wheat Yield Forecasting in Arid Climates Using Operational Field Data
29	85	Employing PCA and LSTM for Intrusion Detection: The KDD99 Evaluation, Deep Modeling, Mathematical Foundations, and System Architectures
30	86	ASHCryptSQL: A Cryptography-Assisted Approach for Detecting and Preventing SQL Injection Attacks in Web Applications
31	95	Semantic File Memory with Relationship Graphs and Hybrid Local Search for Windows Based Personal Knowledge Systems
32	103	FT-OSID: A Forensic-Triage-Oriented Open-Set Intrusion Detection Framework Evaluated Across Three Public Benchmarks
33	114	Hybrid Search in Bulgarian Technical Documentation by Combining Vector Similarity and Lexical Matching
